PROFESSIONAL EXPERIENCE

Neurosurgery Nurse Practitioner, 07/2014 - present

Henry Ford Health System - Clinton Township 7/14 - 8/23; West Bloomfield 8/23 - present

- Assess and manage acute neurosurgical patients in collaboration with neurosurgical colleagues and the senior resident team
- Provide post-operative care for neurosurgical patients, including monitoring postoperative drains, pain management, wound care, labs with intervention as necessary, DVT prophylaxis, and coordination of care for discharge planning
- Assess and document new consultations through ER or per medicine/hospital attending, order appropriate diagnostic testing, and board acute neurosurgical cases for OR
- Patient and family education regarding current plan of care, changes to plan of care, discharge education and expectations, and interdisciplinary recommendations

Neurovascular Stroke Nurse Practitioner, 05/2025 - 03/2025

Henry Ford Health System - Lakeside & Detroit

- Outpatient assessment, management, and follow-up care of post-stroke patients to evaluate for secondary stroke risk factors, pain, function, social support, and emotional status following inpatient admission for stroke or TIA
- Patient education regarding reducing secondary stroke risk
- Utilizing patient-centered care to identify current needs, including medication refills, needed medication changes, diagnostic results, lab results, and referrals as needed
- Participation in stroke department team meetings, quality improvement measures, grand rounds, and continued stroke education through webinars, conferences, and CME

General Surgery Nurse Practitioner, 05/2024 – 05/2025

Henry Ford Health System - Detroit & Fairlane

- Outpatient evaluation and follow-up management for post-operative general surgery patients who have undergone appendectomy, cholecystectomy, or hernia repair
- Post-operative gastroparesis patient management to adjust Enterra gastric neurostimulator as appropriate for gastroparesis symptom management
- New patient consultations with pre-operative teaching if patient deemed appropriate for surgical intervention with Enterra gastro neurostimulator
- Management of electronic in-basket to address patient requests for medication refills, advice, follow-up appointments, diagnostic results, and any patient concerns/questions

Adjunct Assistant Professor, 01/2015 – 5/2024

Madonna University - Livonia, MI

- Control and monitor ongoing instructional activities and policies to maintain adherence of prescribed standards for graduate student evaluation in the clinical environment
- Teach graduate advanced physical assessment and clinical readiness using didactic and laboratory simulation for standardizing student competency and proficiency

- Hold students accountable for the acquired competency in their performance; assist students in remediation to acquire and maintain competency through counseling and instructional motivation
- Conduct clinical site visits to monitor and evaluate continued clinical performance

Internal Medicine & Geriatric Nurse Practitioner, 09/2013 - 07/2014

Dr. Carolyn Guidot; Evergreen Health & Living Center - Southfield, MI

- Assess, treat, and monitor acute post-surgical and internal medicine patients with chronic conditions after transition from inpatient care to a sub-acute environment
- Prescribe medications, order lab work, provide treatment modalities including wound care, removing surgical staples, and interpreting/directing care using lab and diagnostics
- Facilitation of interdisciplinary communication to provide necessary patient care requiring expert consultation and management of chronic problems
- Provide education to patients and families including implementation and changes to plan of care, emotional support for transition into long-term care or end-of-life situations

Neurosurgery Acuity Adaptable Registered Nurse, 08/2008 - 07/2014

Providence & Providence Park Hospital - Southfield & Novi, MI

- Organize and administer care for acuity adaptable neurology patients with epilepsy, stroke, seizure, migraine, craniotomy, cervical/lumbar laminectomy, cervical/lumbar fusion, and mental status changes; monitoring of lumbar drains, ICP, EVD, and continuous telemetry
- Accountable for patient shift reports, patient assessment and documentation, discharge planning, and administering and documenting patient medications and treatments
- Charge nurse and preceptor duties with the ability to delegate, prioritize, and solve conflict management issues using a team-based collaborative approach
