Voluntary Stopping of Eating and Drinking: An ethical alternative to physician-assisted suicide

Voluntary stopping of eating and drinking (VSED) is a legal
and ethical option for patients whose underlying illness has become an intolerable affront to their personhood. To support the autonomy of patients, nurses need to understand the clinical management of VSED so they can educate patients and families of this option.

### Summer Issue of the GAPNA Newsletter is Online

The summer issue of the newsletter is now online. Check out the latest association news, chapter happenings, and pictures from the pharmacology conference.
