September is Sepsis Awareness Month

Sepsis is a complication caused by the body’s overwhelming and life-threatening response to infection, which can lead to tissue damage, organ failure, and death. Sepsis can happen to anyone and is difficult to predict, diagnose, and treat. Click on the link for more info from the CDC and to register for an online webinar.

GAPNA Foundation events at the annual conference in Phoenix, AZ
The mission of the GAPNA Foundation is to provide financial grants to support scholarly research projects related to gerontological nursing and provide educational opportunities for registered and advanced practice nurses working with older adults. Help us achieve this mission by supporting these important fundraising events in Phoenix this year.

**Urological Issues in Post-Acute/Long Term Care**

While many conditions affect the quality of life for patients in post-acute/long term care (PAC/LTC), not many have as significant of an impact on their quality of life as incontinence. The rate of urinary incontinence (UI) in PAC/LTC is between 46 to 76% (Centers for Disease Control and Prevention [CDC], 2014). Read more below.

**Find Your Local GAPNA Chapter**

If you’re not already an active part of your local GAPNA chapter, we encourage you to get involved. Belonging to a chapter is a great way to network with colleagues and find support among peers who share your passion for caring for older adults. If there isn’t a chapter near you, consider starting one!
experienced clinicians.
