

March 22, 2018

The Honorable Stephanie Murphy 1237 Longworth House Office Building Washington, D.C. 20515

Dear Representative Murphy,

On behalf of the 46 undersigned organizations representing the Nursing Community Coalition, we would like to thank you for introducing the Gun Violence Research Act (H.R. 1478). The members of the Nursing Community Coalition are the cross section of education, practice, research, and regulation within the nursing profession. The coalition supports this legislation which would prevent limitations from being imposed on the Department of Health and Human Services, including the Centers for Disease Control and Prevention, to promote evidence-based research that examines the causes of gun violence and identifies methods to reduce gun-related fatalities and injuries.

With over four million licensed Registered Nurses, Advanced Practice Registered Nurses, and nursing students, the profession tirelessly works to continually improve care for patients, families, and communities. This exceptional care is firmly grounded in evidence, compassion, and evaluation. Research to reduce gun-related fatalities and injuries only serves to help those impacted by tragedies, like the most recent act that shook the Parkland, Florida community. The Gun Violence Research Act would enable researchers to study gun violence to create a safer, more secure future and for it to be shared publicly. As a profession driven by science and advocacy, this is a common-sense solution.

Again, we commend the introduction of H.R. 1478, and appreciate your support for America's public health and safety by reducing barriers that impede the promotion of evidence-based research. If the Nursing Community Coalition can be of any assistance to you or your staff, please do not hesitate to contact the coalition's Executive Director, Dr. Suzanne Miyamoto, at <u>smiyamoto@aacnnursing.org</u> or 202-463-6930, ext. 247.

Sincerely,
